Resolutions in memoriam, of thanks, tributes of respect, resolutions adopted by societies or persons, unless of public concern, will be printed in the paper as advertisements.

THE DEATH OF JUDGE WATSON.

The murder of Judge James A. Watson, prominent lawyer and capitalist, who was found dead on his front porch in Parkersburg, W. Va., last Friday morning, with his wallet, containing more than \$2,000, missing, has caused great sensation.

The arrest of Jessie and Lulu Metz, two women in whose company Judge Watson is alleged to have been on the fatal night, was the first startling development. It was followed yesterday morning by the arrest on suspicion of Claude S. Simms, an oil operator, who was associated with Judge Watson in the oil business.

The state's attorney announced yesterday that there had not been sufficient evidence produced against the suspects to warrant their detention longer at this time.

The murder of Judge Watson has exposed to public gaze a new side to the career of the brilliant barrister. On one side he was an able and prosperous lawyer, member of the City Council and a man arrayed always on the side of law and order. He was particularly bitter in waging warfare on liquor and was a rigid teetotaler. It is now alleged that he was at the home of the Metz women.

One theory of the police was that Judge Watson was murdered by being doped with strychnine in the form of knockout drops and that he was then robbed and his body taken and laid on the porch of his own home, more than a mile distant.

Another of the developments yesterday in the investigation of the mystery was the report made by Dr. L. O. Rose, an expert chemist, upon the results of his analysis of the stomach, liver, intestines and other organs of the murdered man, which were turned over to him for analysis. Dr. Rose reported that he had found strychnine poison in large quantities in the stomach of Judge Watson. There was enough of it, according to his report, to kill several ordinary men. A small portion of the stomach juice was given to a large frog and it killed it in a few minutes.

The report of the chemist, with the result of the autopsy, which showed Judge Watson to have been in perfect physical condition, proves conclusively that he was murdered. The testimony of Miss Mary Kelley, Judge Watson's stenographer and confidential clerk, before the coroner's jury, tends to indicate that nearer \$3,000 than \$2,000 in money was stolen from Judge Watson. She testified to having drawn \$2,000 out of bank and turned it over to him, and it is known that he had several hundred dollars beside this amount. All of this sum is missing, and there is hardly any doubt that the motive for the murder was to get this money.

Soreness of the muscles, whether induced by violent exercises or injury, is quickly relieved by the free application of Chamberlain's Liniment. This liniment is equally valuable for muscular rheumatism, and always affords quick relief. Sold by W. F. Creighton and Richard Gibson.

CONFLICT BETWEEN CHURCH AND STATE.

One hour after presenting the note of Premier Canalejas to the Vatican officially announcing that Marquis de Ojeda had been "called to Madrid for a communication from the government," the Spanish Ambassador to the Vatican left Rome. This was early yesterday morning, and as yet no retaliatory measures have been taken by the church, and Monsignor Vico still remains in Madrid as papal nuncio.

With Catholics in Rome expressing hopes that Don Jaime, the Carlist pretender, may raise the stand and of revolt and the Catholics of the Biscayan provinces rise in insurrection and with the socialists in Spain threatening disorder, the Imperialist of Madrid which has hitherto been friendly to Premier Canalejas, ranges itself upon the side of the government in the pending conflict with the Vatican.

The liberal press in general continues staunchly to support the cabinet which has been left a free hand to carry through its policy by the departure by King Alfonso and his queen for England.

The liberal press expresses special indignation at the telegram of Cardinal Merry del Val, the papal secretary of state, indorsing the attitude of the Biscayan Catholics, who threatened to precipitate civil war and in a telegram to the Vatican placed their lives and property at its disposal for the conflict.

The Roman Catholic priests throughout the Biscayan, or northern provinces of Spain, preached violent sermons Sunday against the policy of the government in its conflict with Rome.

Preparations for a great Catholic demonstration against the government August 7 are being continued, in spite of the declaration of the government to its organizers that no demonstration threatening disorder would be allowed.

Only about 3,000 communicants and regular attendants of Protestant churches live in Spain, according to the

last estimate for the State Department in Washington made two or three years ago. This estimate was prepared by the representatives of the American Board of Commissioners for Missions. In addition to the 3,000 regular attendants it was estimated that there were about 10,000 Protestant adherent, persons who through attending services only occasionally were more in sympathy and accord with the Protestant church than with the Catholic.

THE SOUND OF THUNDER.

It is to Professor Trowbridge that we owe an experiment to explain the noise of thunder. It has usually been thought that the noise is caused by the closing up of the vacuum created by the passage of the lightning, the air rushing in from all sides with a clap; but the intensity of the noise is rather disproportionate, and it is now supposed that the thunder is due to the intense heating of the gases, especially the gas of water vapor along the line of the electric discharge and the consequent conversion of suspended moisture into steam at enormous pressure. In this way the crackle with which a peal of thunder sometimes begins might be regarded as the sound of steam explosions on a small scale caused by inductive discharges before the main flash. The rumble would be the overlapping steam explosions, and the final clap, which sounds loudest, would be the steam explosion nearest to the auditor.

In the case of rumbling thunder the lightning is passing from cloud to cloud. When the flash passes from the earth to the clouds the clap is loudest at the beginning. Professor Trowbridge gave substance to these suppositions by causing electric flashes to pass from point to point through terminals clothed in soaked cotton wool, and he succeeded in magnifying the crack of the electric spark to a terrifying extent.—[London Graphic.]

LYNCHING OF NEGROES.

Telephone wires in the vicinity of Dady, Fla., were cut last night, and negroes were reported to be fleeing for their lives from that section.

Business was reported suspended late yesterday, while farmers left their fields to join posses bent on carrying forward vengeance for the murder of the little schoolgirl, Bessie Morrison, who was slain last Friday.

Yesterday it was reported that a negro had lent an amulet to one of the colored men alleged to have slain the child. This negro was immediately captured and a rope put around his neck, and as he swung from the limb of a tree his body was shot almost to pieces.

According to information in Pensacola, he is the fourth negro lynched for this murder. The cutting of the telephone wires made it impossible to learn the cause of the hunt for negroes said to be in progress last night.
